

Ebox-335 Series

Each code shows the key features of the device

- **3350 / 3352** → The last number indicates RAM. 0 = 1GB RAM, 2 = 2GB RAM.
- **DX3** → Processor, this is the same one in all models.
- **C2** → Number of RS232 serial ports (1x default, 2x if "C2" is included).
- **V** → VGA video output (HDMI is default). So RCA is HDMI, RCAV is VGA.
- **AP** → Auto Power On feature. If not in code, it's not supported.
- **W** → Wide temperature support. If not in code, it's not supported.
- **GL** → Gigabit LAN (GbE) instead of standard LAN.
